raid-safe™ Express

TIME DELAY DROP SAFE

The **raid-safe™ Express** range are time delay electronic drop safes designed to minimise the cash available to the raider. **raid-safe™ Express** are designed as effective low-cost deterrents for retailers and provide the retailer with a high level of cash security that is easy to use and install.

Manufactured to the highest quality, both safes feature an electronic 4-digit key code time lock, making the safe easy to use and eliminating the need for keys.

Designed to suit retail environments **raid-safe™** is fixed through the back and base using heavy duty expanding bolts. **raid-safe™** does not require a power source other than its own self-contained battery; although in the event of the battery failing alternative power can be simply applied to open the safe.

Raid-safe Express CC

Size in mm: 300(H) X 120(W) X 250(D)
